To Whom It May Concern:

Git-R-Done Pest Control, LLC was contracted to treat the prairie dog infestation surrounding our immediate warehouse area in the fall of 2007. We are very pleased with the prairie dog control efforts that Rick and Git-R-Done Pest Control have shown on our property.

We first contacted Git-R-Done Pest Control in August of 2007 for immediate fumigation of prairie dog burrows using a product called "Phostoxin", a gas pellet placed in each hole that is approved for use anytime during the year. They treated the immediate warehouse area with 90% plus control. Construction on nearby parcels and disruption of burrows and nearby lands without initial pest control allowed those prairie dogs from adjoining parcels to move back into our area within weeks. Rick convinced us to wait until November 1st (per Rozol label requirements and Colorado approval dates) so that Git-R-Done could use Rozol bait which he explained would have quicker application, would be cheaper to use, and likely be much more effective. Rick helped contact surrounding land owners in the business park where our warehouse is located to explain how cooperative pest treatment among adjacent lands would help with effective control of prairie dogs benefiting all land owners.

Git-R-Done returned after November 1st of 2007 and treated our property as well as the surrounding business park and achieved 100% control of these pests. We have not seen a prairie dog on our property since November of 2007.

In the past, other pest control companies that we hired used Phostoxin as well, but only achieved 50-60% control. Additionally, application was so labor intensive that it required several days for application. Git-R-Done used all terrain vehicle equipment with "Rozol" bait, and completed the work in a few hours. Not only did Git-R-Done get 100% control with Rozol, they were half the cost of the previous contractors. Rick is very easy to work with and goes out of his way to arrange for the best control possible on prairie dog infested lands. I highly recommend Git-R-Done Pest Control for prairie dog control measures.

Sincerely,

Dennis Ginther,
