

To Whom It May Concern,

I am the manager of a local towing lot. I noticed that we had a problem with prairie dogs on our property. I contacted an exterminator, on recommendation from another employee. The company came right out and said that they would take care of the problem and they would guarantee there work. They used some sort of smoke generating, firework looking, device. The next spring I noticed that there were still prairie dogs, so I called the company and they never returned my calls. Very disappointing.

Rick from Git-R-Done Pest Control, Inc. came by because he was working in the area, and had noticed the prairie dogs. Rick took care of the problem right then and also guaranteed his work. The prairie dogs were gone right away and we haven't had any more since. This is the kind of service I expect and I highly recommend Rick, he does Git-R-Done. Rick's price was less expensive than the first company and the results speak for themselves.
